SKILLS

I am a software developer based in Addis Ababa, specializing in building clean and modern sites within the JavaScript ecosystem. Passionate about building digital solutions, I create innovative tools and solve real-world problems through code.

I'm the creator of [Linkroot](#), an AI-native Linktree alternative for people who value minimal designs! I have extensive experience in different parts of development and have contributed to open source, enterprise and governmental projects.

EXPERIENCE

Ariya Advertising Agency, Dire Diwa - *Frontend Dev*

April 2023 - PRESENT

- I still work at this agency as a frontend dev, creating clean sites with shadcn components!
- Also kinda a team lead there as well.

Private Client, US - *Software developer*

July 2024 - Aug 2025

- Private client I found through Upwork.
- Finished one-time project and delivered on time!

EDUCATION

Hachalu Hundessa, Addis Ababa - *Incomplete*

May 2023 - June 2025

I'm a dropout. Or you can call me a self-thought developer.

AWARDS

I have an award winning [community](#).
